How to optimize patient-provider communication with telehealth in the era of multigene testing

Dr. Angela Bradbury she is an Assistant Professor in the Department of Medicine, Division of Hematology-Oncology, at the University of Pennsylvania and has a secondary appointment in the Department of Medical Ethics and Health Policy. Dr. Bradbury completed her residency in internal medicine and two fellowships (Hem-Onc and Medical Ethics) at the University of Chicago.

Dr. Bradbury specializes in the treatment of breast cancer and cancer genetics. Her research focuses on the clinical implementation of genetic medicine to promote the health of individuals and families. Dr. Bradbury’s research also includes evaluating models for dissemination and implementation of cancer genetics, evaluating the psychosocial and behavioral outcomes of genetic testing, and the impact of genetic and familial risk on children, adolescents, and families.
